

HEALTHAPP AUTOMATION

SOCIAL SERVICE MODULE-PL1

Pre-requisite:

As soon as you import project in eclipse, update the project using maven update option as below. This is to resolve issue if any maven dependency not downloaded properly:

1. Right click on project : Go to “Maven” : Select “Update Project”

2. In Update Maven Project Box Select “Force Update of Snapshots/Releases” and click OK

Template Code Structure:

- a. Below are the packages and files you will be required to work upon.
- b. Other Files and packages you can ignore.
- c. In other Files and packages do not do any changes. It would affect your evaluation.
- d. You are not required to work in "Test" Folder. Files there are non-editable. Editing those files and trying to save them will throw error and would affect your evaluation.

Package	Class/File	Description
/src/main/java/pages	socialService_Pages.java	<ol style="list-style-type: none">1. All core activities (mentioned in list above) to be performed here.2. The comments associated with each templated method here describe the expectation.3. You can define locators and xpath here.4. Declare any variable/object you need to share data/status between different methods.5. Do not modify the signature of methods declared here.6. You can create additional supportive common methods in CommonEvents class.
/src/main/resources/	Config.xlsx	URL to navigate to: Already URL is defined here
	expected_data.xlsx	Contains data to fill in form
/src/main/java/coreUtilities/utis	CommonEvents.java	<ol style="list-style-type: none">1. Contains all common activities.2. Certain templated common method declared here.3. You implement them as per your need.4. You can add any additional method for common activity here
	Testng.xml	Execution needs to kick started from TestNG xml

PROBLEM STATEMENT

Need to automate the following activities using Selenium + Java.

Key Activities to implement:

SI No.	Summary	Action	Expected Result
1	Verify the title and url of the current page.	1. go to url : https://healthapp.yaksha.com/ 2. login as valid credential (username : admin , password : pass123) and click on "SignIn" Button 3. get the title and url of the Home page, post login 4. validate the title and url of the Home page	Title should be : DanpheHealth Url should be : https://healthapp.yaksha.com/Home/Index#/
2	Verify that SocialService module is present or not ? If Social Service Module is present then Then go to SocialService Page.	1. user must be logged in 2. Check SocialService module is present in left navigation 3. Click on the SocialService Module	User successfully navigate to the SocialService page
3	Verify that Register New SSU Patient button is present inside the SocialService page and when we click on " Register New SSU Patient " button , it popup " New SSU Patient Registration " form.	1. User is on SocialService page 2. find and click on " Register New SSU Patient " button and verify the form Name /title is "New SSU Patient Registration"	user should found the " Register New SSU Patient " button, clicking on it and open the " New SSU Patient Registration " form. Form title /name should be " New SSU Patient Registration "
4	On the " New SSU Patient Registration " form, Validate the error message in Last Name textfield without filling any data and clicking on " Register " Button	1. click on " Register " button directly without fill any information in " New SSU Patient Registration " form's 2. then an error message will display under the Last Name textfield. 3. then validate the error message.	Error message should be : Last Name is required
5	On the " New SSU Patient Registration " form's validate that First Name, Middle Name & Last Name textbox are present or not ? If present then fill the below textbox : First Name textbox Middle Name textbox Last Name textbox Check the data which we are entered are present in First Name textbox or not ?	1. user must be On the "New SSU Patient Registration" form's 2. verify theFirst Name, Middle Name & Last Name textbox is present ? 3. if Present then Enter data in the First Name textbox 4. Enter data in the Middle Name textbox. 5. Enter data in the Last Name box. 6. then verify the value which is present in First Name textbox.	On the " New SSU Patient Registration " form's below textbox should be present: First Name textbox Middle Name textbox Last Name textbox The entered data should be correctly displayed in First Name textbox on " New SSU Patient Registration " form.
6	On the Social Service module's, " New SSU Patient Registration " form, select India from the country dropdown and validate India is properly selected or not.	1. on the Social Service Module, user must be on " New SSU Patient Registration " form 2. Select country as India in the country dropdown in " New SSU Patient Registration " form	User should able to select India as country from the country dropdown menu.

7	scroll to the bottom of the "New SSU Patient Registration" form and verify that "Register" button and "Close" button are present or not?	1. User must be on "New SSU Patient Registration" form. 2. scroll to the bottom of the "New SSU Patient Registration" form 3. verify that "Register" button and "Close" button are present or not?	user should be perform the scroll operation and "Register" button and "Close" button should be present.
8	Validate that the following warning message is existing in "SSU Information" Section of the "New SSU Patient Registration" form.	1. User must be present on "SSU Information" Section of "New SSU Patient Registration" form 2. validate the warning message (Membership Scheme(s) is Mandatory) existing ?	warning message should be : Membership Scheme(s) is Mandatory.
9	On "New SSU Patient Registration" form's, in the "SSU Information" section, select "Yes" from the "Has target group certificate?" dropdown. Verify that "Target Group Certificate Type" textbox and "Certificate No." textbox is coming after select the "Yes" from dropdown.	1. User must be present on "SSU Information" Section of "New SSU Patient Registration" form 1. Go to "Has target group certificate?" dropdown 2. select "yes" from "Has target group certificate?" dropdown 3. Verify that "Target Group Certificate Type" and "Certificate No." textbox is coming after select the "Yes" from the "Has target group certificate?" dropdown.	"Target Group Certificate Type" textbox and "Certificate No." textbox should be displayed after select the "Yes" from "Has target group certificate?" dropdown.
10	On the "New SSU Patient Registration" form's, get the place holder name of "Address" textfield of "New SSU Patient Registration" page and verify the place holder name.	1. user must be present on "New SSU Patient Registration" form's. 2. click on "Address" Textfield 3. Then get the place holder name of "Address" text field 4. verify that place holder name and print on console.	placeholder name should be "Address" and then print on console
11	On the "New SSU Patient Registration" form, Close this "New SSU Patient Registration" popup page by using JavaScript.	1. user must be present on "New SSU Patient Registration" form's. 1. Click on the "X" / close button using JavaScript	"New SSU Patient Registration" popup page should be closed.
12	navigate back to the home page , refresh the current page and then verify that Registered Patient, Total Doctors & Today's Appointments fields are present or not? Then navigate forward to the social service module's SSU PatientList page and then verify that "SSU Patient List" button & "Register New SSU Patient" button are present or not ?	1. user must be present on "SSU Patient List" page 3. navigate back to the home page using navigation back method 4. refresh the using navigation refresh method 5. verify the below fields are present or not in home page: Registered Patient, Total Doctors Today's Appointments 6. then forward to the social service module's SSU PatientList page using navigation method 7. then verify below buttons are present on SSU Patient List page: "SSU Patient List" "Register New SSU Patient"	user should be navigate back , refresh and able to see the below fields in home page Registered Patient, Total Doctors Today's Appointments then user should forward to the SSU Patient List page and able to see the below buttons : "SSU Patient List" "Register New SSU Patient"

NOTE: "Please do not delete any file in the src folder. But you are free to add any other file".

Expectations:

- 1) Learners should write automation script using Java and selenium to automate all the steps in the above question. In other words, automation script should perform all mentioned steps.
- 2) Learners should not use any tools to create the xpath. They should develop the xpath/cssselector on their own.

IMPLEMENTATION/FUNCTIONAL REQUIREMENT

1.1 CODE QUALITY/OPTIMIZATIONS

1. Associates should have written clean code that is readable.
2. Associates need to follow SOLID programming principles.

EXECUTION STEPS TO FOLLOW

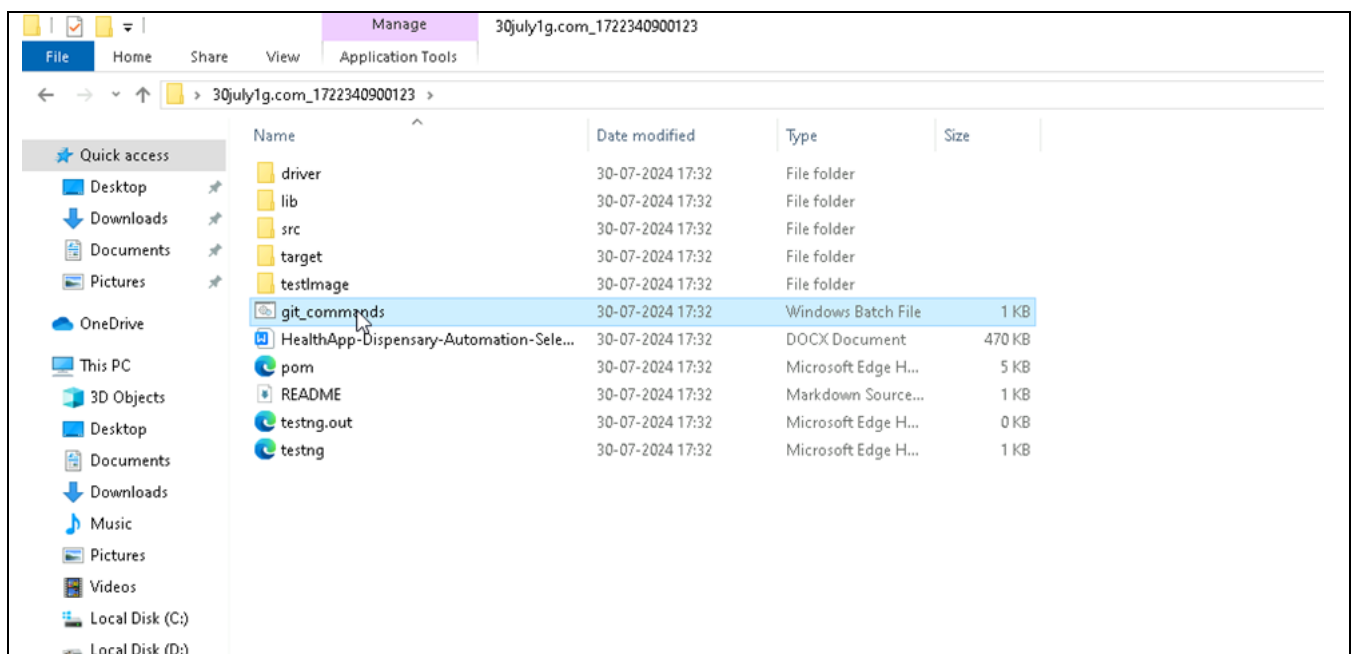

1. **You are mandatory required to run test cases for applications before final submission. Without which project evaluation will not happen.**
2. **You can launch test cases any time as follows: Right click on testng.xml and run TestNGSuite**

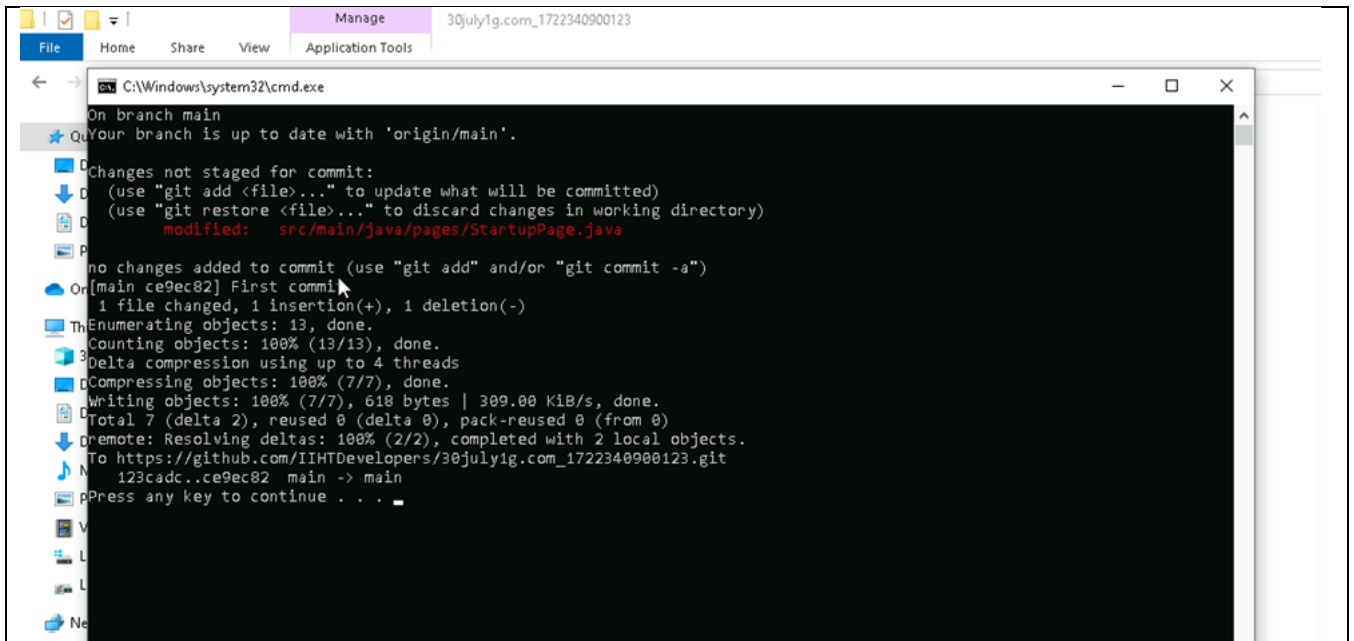

3. Before final submission, you are also required to push your code to GIT. Following are the steps to follow:

In your project folder, you will find a batch file named `git_commands`

Double-click the batch file to run it. It will run the commands to push your code to GIT.

=====

All the Best

4.
